

The Dream Team Program

Hybrid 5 day Residency + Private Lessons

The Program - \$2100

Looking for a more collaborative approach that combines professional training with hands-on owner coaching? This Partnership Program is designed as a true hybrid experience where your dog builds real-world skills through a short residency while you learn how to confidently continue the training at home. Your dog will participate in a 5-day residency at Professional Pups following pre-program private lessons that help set clear goals and begin the training process. During residency, Blayne will build foundational obedience and manners while also addressing challenges in real time. Owners will be actively involved through structured private lessons before, during, and after the residency to ensure clear understanding and consistency at home. The goal of this program is to create faster progress through combined training and coaching, giving both you and your dog the tools needed for long-term success.
